

## Privacy Checkup for WhatsApp

What we are checking?	Features	How to check? (for stock Android)	Why we are checking this?
<i>Who can see when you were Last Seen</i>	Last Seen	Settings (bottom right) → Privacy → Last Seen	WhatsApp users can choose who they share their Last Seen with, whether it be everyone, only their contacts, or nobody.
<i>Who can see your Profile Photo</i>	Profile Photo	Settings (bottom right) → Privacy → Profile Photo	WhatsApp users can choose who can see their Profile Photo, whether it be everyone, only their contacts, or nobody.
<i>Who can see your About</i>	About	Settings (bottom right) → Privacy → About	WhatsApp users can choose who can see their About, whether it be everyone, only their contacts, or nobody.
<i>Who can see your Status</i>	Status	Settings (bottom right) → Privacy → Status	WhatsApp users can choose who can see their About, whether it be only their contacts, their contacts except certain ones, or with a select few contacts.
<i>WhatsApp Web</i>	Everything (chats, media, etc.)	Three-dot → WhatsApp Web → Check for the “Logged in devices”	WhatsApp Web allows syncing complete WhatsApp session with another device (held by the abuser). Needs: One-time <b>physical access</b>
<i>WhatsApp backup</i>	Everything (Chat, media (if synced))	Settings → Chats → Chat backup → “Google Drive settings”	WhatsApp allows backing up chats and media content with GDrive. An abuser with access to victim’s GDrive can read the victim’s messages using the backup. Need: GDrive account creds + victim’s phone number
